

The SUNY Plattsburgh Institute for Ethics in Public Life presents  
**AI and Education**  
Sep. 23 (W) at 3:30 in person or on Zoom (see below)

Educational institutions are still wrestling with how to deal with generative AI four years after it arrived. What role, if any, should AI models have in an educational environment? To what extent does the use of AI compromise student learning? Should educational institutions be teaching students to use AI models as part of their curriculum? Or should their use be banned on the basis that they compromise student learning? Responses currently range from complete bans to anything goes. What are our concerns, and what is currently known about the impact of AI on student learning?

We welcome special guest Dr. John Locke, Director of the Center for Instruction and Program Innovation at SUNY Plattsburgh, to help us understand this important topic. This forum is an opportunity for students, faculty, administrators, staff, alumni, and community members to come together and learn about this issue.

Join us in person in Hawkins 233 (the Institute offices) or  
on Zoom at <https://plattsburgh.zoom.us/j/84838131986>

The Institute for Ethics in Public Life is generously supported by gifts to the  
Plattsburgh College Foundation.
