The SUNY Plattsburgh Institute for Ethics in Public Life presents

“Should we slow down AI development?”

Nov. 4 (W) at 3:30 in person or on Zoom (see below)

In recent months there have been a rash of stories about companies losing control of their AI models. This triggered calls for shutting down AI research, at least until it is possible to control new models better. Potential risks posed by AIs are not new, including its use for surveillance, development of new bio-weapons, using it to “nudify” people (including children), hack websites, manipulate voters, and the existential threat posed if we create "digital beings" more intelligent than us. So what should we do?

We welcome special guests Dr. Lauren Eastwood (Sociology) and Dr. Michael Walters (Physics) to help us understand this important topic. This forum is an opportunity for students, faculty, administrators, staff, alumni, and community members to come together and learn about this issue.

Join us in person in Hawkins 233 (the Institute offices) or on Zoom at https://plattsburgh.zoom.us/j/85806216664

The Institute for Ethics in Public Life is generously supported by gifts to the Plattsburgh College Foundation.
